OF APPLIED SCIENCES AL-HOCEIMA

ORGANIZE

THE SECOND EDITION OF THE INTERNATIONAL CONGRESS ON WATER AND ENVIRONMENT STUDIES

MULTIDISCIPLINARY FACULTY OF NADOR - MOROCCO
14 - 15 NOVEMBER 2019

PARTNERS

PRESENTATION

Water management and environment protection are one of the main keys of the worldwide sustainable development. Currently, they present the focus debates between researchers, political, economists and socials communities. Thus, the Second Edition of the International Conference on Water and Environment Studies (CI3E) aims to highlight on the importance and awareness of water and environment.

This meeting will emphasis on solutions and alternatives of different issues facing these areas. In addition, this international meeting will show recent and updates researches realized in field of water and environment. CI3E meeting will be held, in November 14-15, 2019, at the Multidisciplinary Faculty of Nador, University Mohammed First, in Nador City, Morocco. The conference present and occasion for meeting with researchers, professionals, associative and public interested and involved in this sector.

Moreover, CI3E is an opportunity to exchange knowledge, as well as to identify new research topics in field of water an environment and to start new collaborations between different actors.

SCOPES AND TOPICS

Topic 1: Water

- Impacts of wastewater and treatment process.
- Integrated management of water resources.
- Desalination of seawater and groundwater.
- Water materials' interactions.
- Chemical engineering applied to water.

Topic 2: Solid waste

- Management, treatment and valuation.
- Recycling and leachates.
- Biogas and bio-methanisation.

Topic 3: Air and soil

- Standards and quality.
- Pollution and impacts.
- Depollution processes.

Topic 4: Biodiversity and sustainable development

- Ecosystem balance.
- Biodiversity and degradation.
- Biodiversity management and sustainable development.
- Agriculture and agri-food.

Topic 5: Renewable energies

- Solar, wind, hydro, biomass and geothermal energy.
- Storage and distribution management.
- Environmental constraints.
- Highlighting of local resources of energy.

Topic 6: Climate change

- Climate evolution.
- Impacts on fauna and flora.
- Impacts on oceans and seas.
- Strategies and alternatives solutions.
